Advanced Course Permission Request Form

Department of Chemistry State University of New York Stony Brook, NY 11794-3400

Students registering in CHE 487, Research in Chemistry, or in CHE 495-496, Senior Research, need to obtain special permission from both their instructor and the department. In order to obtain this required permission and to be registered in the course, this form needs to be submitted to the Director of Undergraduate Studies each term for students enrolling in CHE 487 and in the fall for students enrolling in the two-semester sequence CHE 495-496. Once this form is completed and submitted, the Department will give permission for the course. Students will then register themselves through the Solar System.

Each course is divided into multiple sections, with one section assigned to each member of the Chemistry Faculty. Be sure to sign up for the correct section. At the end of the term students in CHE 487 must submit a report to their instructor. At the end of the spring semester, students in CHE 495-496 must submit a research report, a "Senior Thesis," and make an oral presentation to a committee of faculty members. These oral presentations will be part of the Senior Research Symposium held in the Chemistry Department during the month of May.
