Number and amounts in this table correspond to official financial aid data reported to the U.S. Dept. of Education following guidelines for the Integrated Postsecondary Education Data System and are comparable to amounts reported by other institutions following federal definitions. Because this data collection includes only students enrolled in the fall term, the total number of financial aid awards in each category during a fiscal year (July 1 - June 30) is somewhat higher because it will include students enrolled in terms other than fall. Amounts reported represent award amounts for the academic year. Institutional aid for athletics was excluded prior to 2012-13.

1: Undergraduate enrollment included in the financial aid cohort; figures may differ slightly from official headcount for undergraduates reported on IPEDS Fall Enrollment (EF) survey.

2: 2006-07 and 2007-08 does not use survey data, it is recreated from administrative records. Data were not comparably collected for all undergraduates until 2008-09.

3: Pell data were updated for 2010-11 and 2011-12 to correct over reporting.

*2019-20, 2020-21, and 2021-22 includes Federal Funding from the CARES Act / CRRSAA HEERF II, interpret with caution.
